

# ABOVEGROUND DOUBLE WALL LIQUID STORAGE

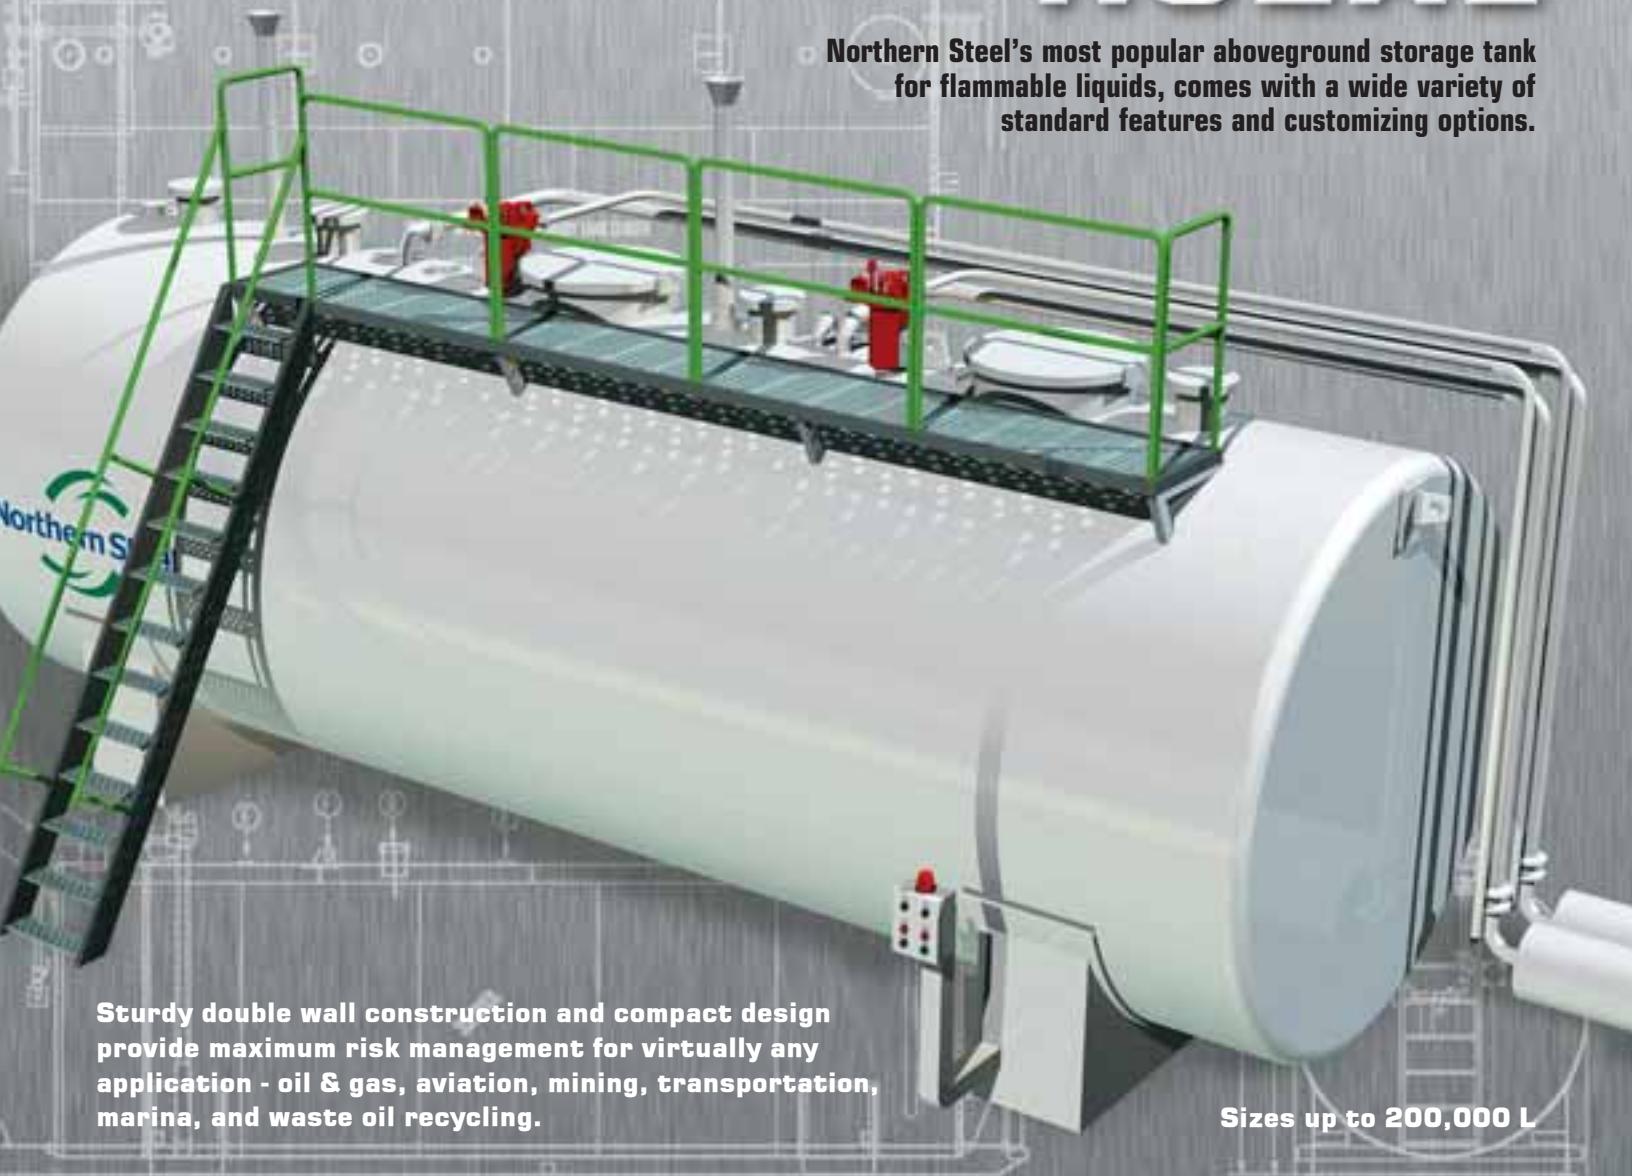

## Northern Steel

PROTECTING TOMORROW ... TODAY!

**Double Wall Construction**  
**110% Secondary Containment**

# HSEAL

Northern Steel's most popular aboveground storage tank for flammable liquids, comes with a wide variety of standard features and customizing options.

Sturdy double wall construction and compact design provide maximum risk management for virtually any application - oil & gas, aviation, mining, transportation, marina, and waste oil recycling.

Sizes up to 200,000 L

## Durable, Dependable Liquid Storage

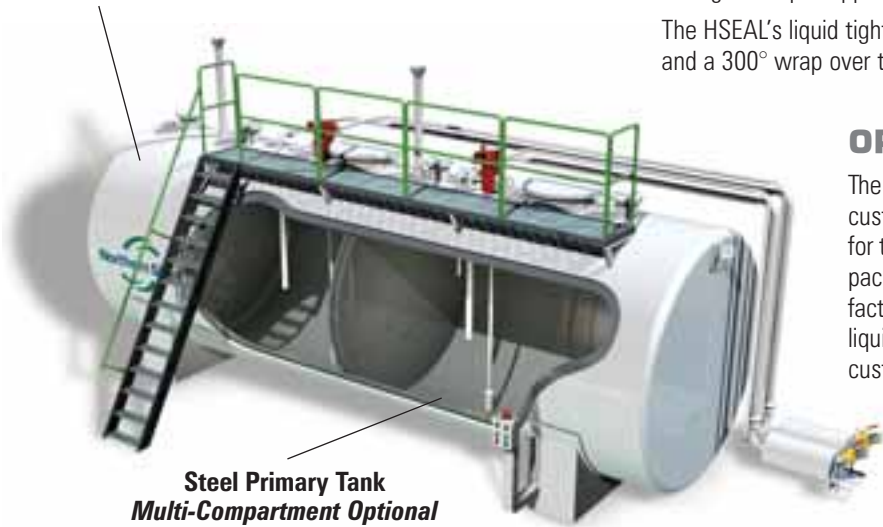

### 110% Containment Steel Secondary Tank

The high quality construction of Northern Steel's **HSEAL** provides years of reliable storage for liquid applications.

The HSEAL's liquid tight secondary containment has 110% capacity of the primary tank, and a 300° wrap over the primary tank.

### OPTIONAL FEATURES

The HSEAL tank can be customized to meet the specific needs of the customer. The optional multi-compartment design provides storage for two or more products. Optional features include a heavy duty skid package, platform or cabinet mounted pumps, remote top filling, factory supplied piping, interior linings for storage of a variety of liquids. We will paint to customer specifications and can also design custom parts to suit your application.
