

Northern Steel

PROTECTING TOMORROW ... TODAY!

**Double Wall Construction
Urethane Insulated, Catalytic Heating**

VEPT-H

The Vertical Environmental Protection Tank-Heated provides worry free aboveground storage for all applications where keeping the product above freezing temperature is important.

Durable, Dependable Heated/Insulated Liquid Storage

The **Vertical Environmental Protection Tank (Heated)** from Northern Steel provides end-users with peace of mind aboveground storage for all applications where the product being stored must be kept above freezing temperature. The innovative vertical design incorporates a smaller footprint where space is important while offering accessibility ease.

The double wall construction ensures maximum risk management for virtually any liquid. The options for secondary containment are: 110% contained, 100% contained vacuum monitored or 100% contained which meet all regulatory guidelines and do not require any additional diking.

Contact your sales representative for available standard and custom sizes.

STANDARD FEATURES & SPECIFICATIONS

- Ladder and safety hoop
- Thief hatch ring
- Centre roof vent
- Conforms to G-55 requirements
- Warranty: 2 year structural, 2 year coatings
- Available in 25 BBL to 400 BBL
