

ABOVEGROUND VERTICAL ENVIRONMENTAL PROTECTION

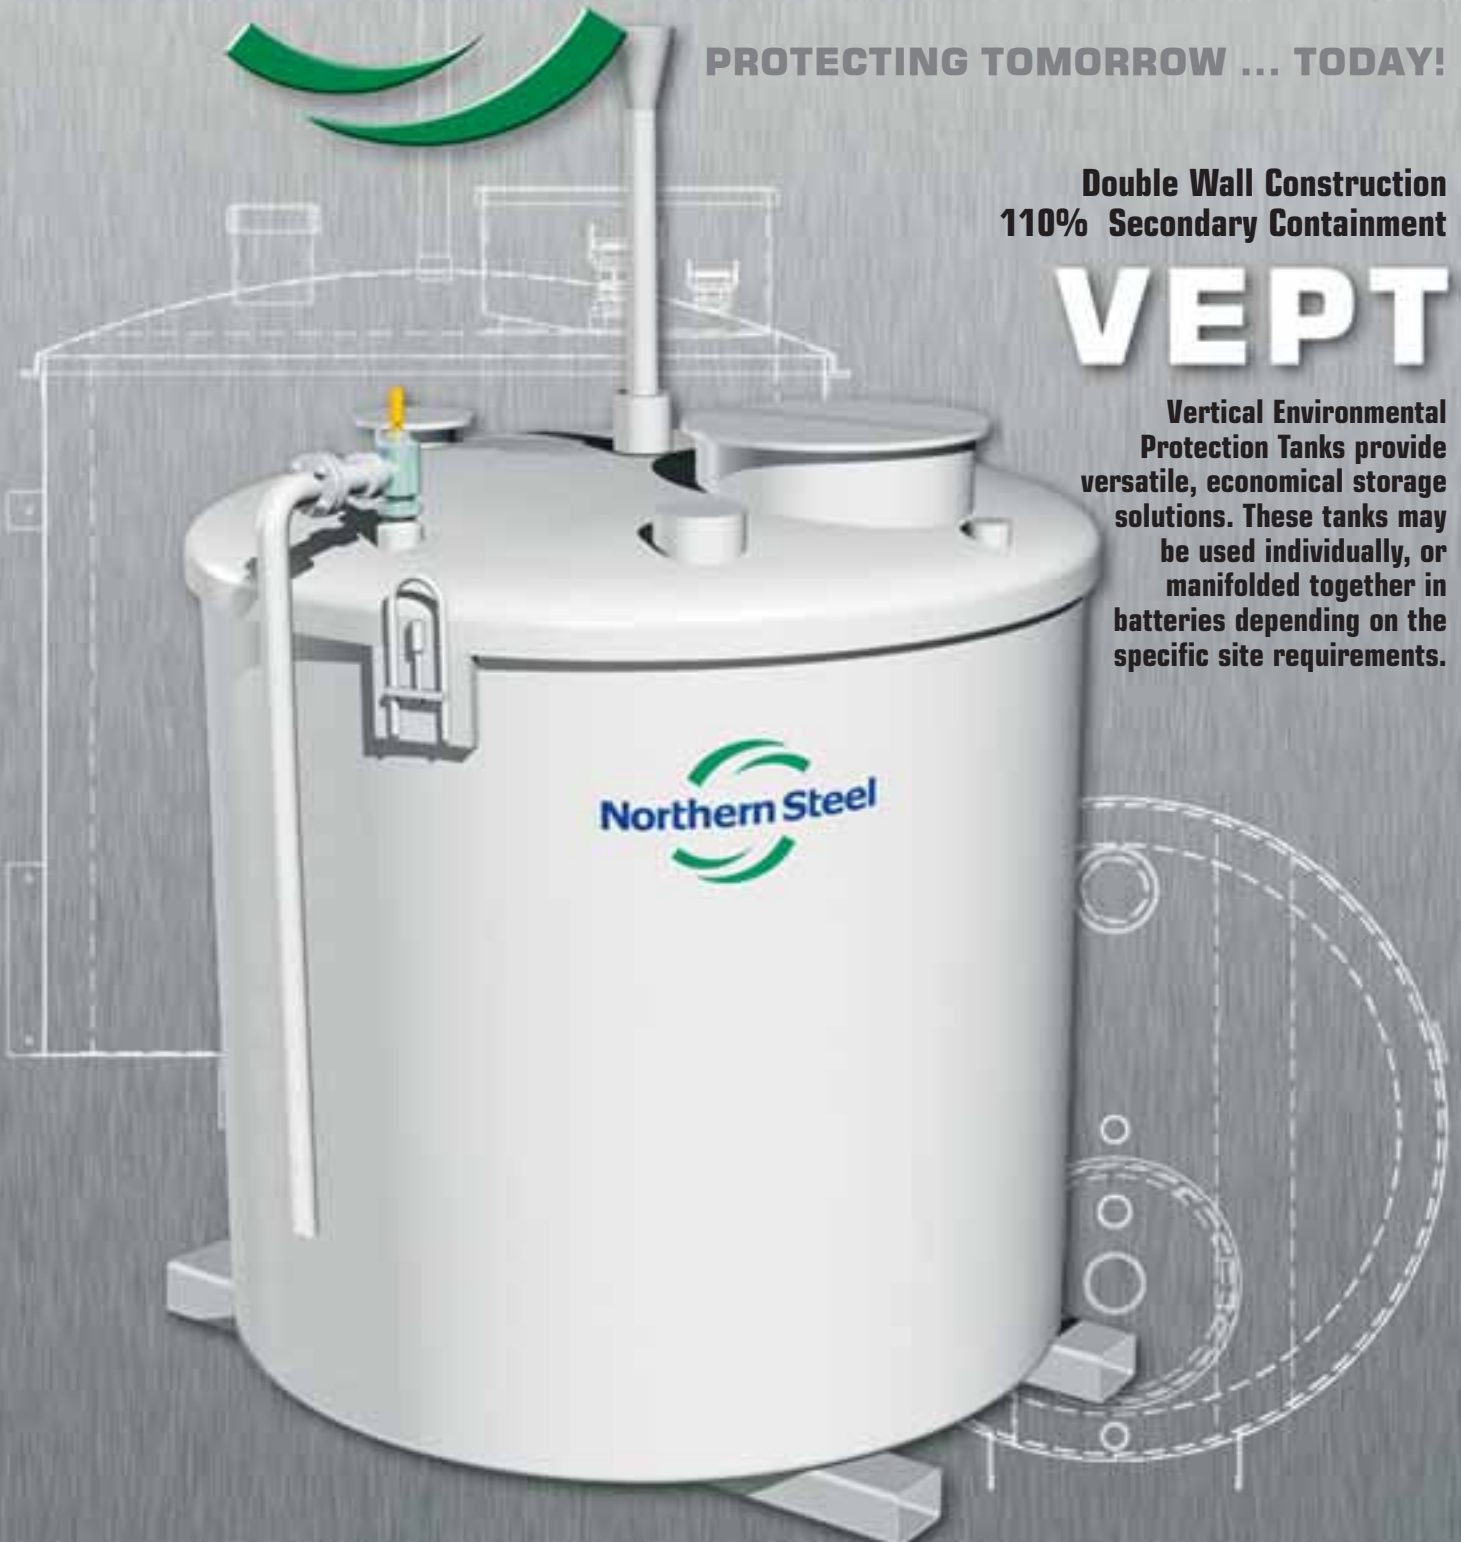

Northern Steel

PROTECTING TOMORROW ... TODAY!

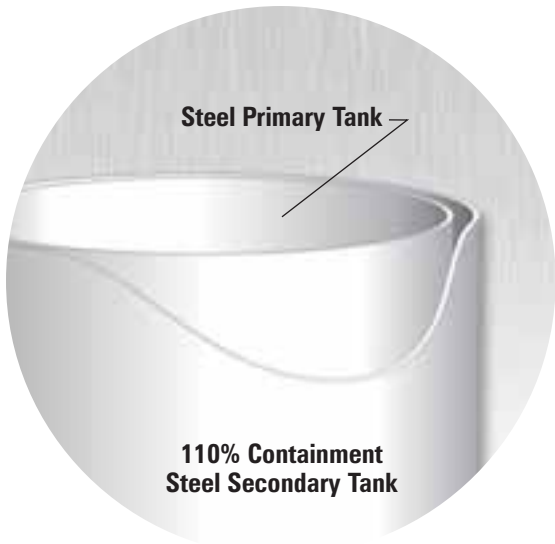

Double Wall Construction
110% Secondary Containment

VEPT

Vertical Environmental Protection Tanks provide versatile, economical storage solutions. These tanks may be used individually, or manifolded together in batteries depending on the specific site requirements.

Durable, Dependable Liquid Storage

Northern Steel's Shop Fabricated **Vertical Environmental Protection Tanks** provide versatile, economical storage solutions. These tanks may be used individually, or may be tied together in batteries depending on specific site requirements.

The double wall construction ensures maximum risk management for virtually any liquid. The options for secondary containment are: 110% contained, 100% contained vacuum monitored or 100% contained which meet all regulatory guidelines and do not require any additional diking.

These tanks can be relocated from site to site with minimum cost and effort.

Contact your sales representative for available standard and custom sizes.
